EMPLOYMENT

WEB DEVELOPER – Zenit   2018—2019
- Successfully launched a large full-stack project (Laravel, Vue, jQuery, PHP, Blade) for a bovine company, improving the company's processing times.
- Worked in a wide database construction, handling multiple relationships, migrations, and seeders for an easy backend collaboration environment.
- Implemented new tools, such as the use of VueJS instead of jQuery, encouraging best practices.

WEB DEVELOPER – Freelance   2014—2018
- Created and deployed multiple websites with support for thousands of views.
- Created and deployed client websites, expanding the customer's scope in the local market.
- Revamped website UI and backend, improving site performance and doubling page load speed.
- Created data crawlers to automate ad publishing, resulting in thousands of daily views.

TECH SUPPORT – RunIt   2012—2012
- Remotely assisted hundreds of customers with databases and ticket issues.
- Coached clients with many OS and driver install.

EDUCATION

CERTIFICATE IN FULL STACK DEVELOPMENT – Microverse   2019—2020
- Completed 1000+ hours on a full-time remote pair programming course.
- Attained mastery in multiple languages and important frameworks such as React on Ruby on Rails.
- Mentored junior full-stack developers, assisting them with code reviews and technical/soft skills.

LIC. SISTEMAS DE INFORMACIÓN – Universidad de Guadalajara   2011—2014
- Bachelor's degree
